ABOUT

Front-end developer with a focus on creating visually appealing and user-friendly web interfaces. My expertise extends to full-stack and general web development when projects demand it. I have a knack for quickly learning new stuff and applying them to make innovative solutions. My approach combines creative design with functional implementation, resulting in engaging and efficient web applications.

SKILLS

HTML, CSS, SASS, JavaScript, Tailwind CSS, React, Next.js, Framer Motion, Astro, Three.js, MongoDB, APIs, Git, Figma

EXPERIENCE

FREELANCE WEB DEVELOPER
(07/24 - 12/24)

LAODIKYA WEB (Self-Employed)

- Designed and developed responsive, user-friendly websites for diverse clients across various industries
- Implemented SEO best practices to improve clients' online visibility and search engine rankings
- Utilized latest web technologies and frameworks to create modern, efficient web solutions
- Managed client relationships, from initial consultation to project delivery and ongoing maintenance

BARBACK
(07/24 - 08/24)

Goldcity Hotel 5* - Alanya

- Prioritized exceptional customer service by anticipating guest needs, helping serve drinks quickly, elegantly and happily
- Effectively communicated in English and provided quick solutions to guests' questions and requests
- Supported special events and busy periods, showcasing adaptability and teamwork in high-pressure situations

WAITER
(04/23 - 07/23)

BEER & BEAR CAFE BISTRO - Izmir

- Anticipated and fulfilled regular customers' needs based on their order history
- Contributed significantly to the highest turnover day, efficiently managing a high volume of orders and customers
- Seamlessly adapted into a new bistro team while helping their opening day
- Maintained a clean and organized dining area, ensuring a pleasant experience for all guests

PROJECTS

- **emregnd.com:** Fourth version of my portfolio website. Used both timing and scroll based animations. Maintained a minimal and creative approach, while keeping it responsive to all devices. Used React, Framer Motion and Tailwind CSS.
- **Ethera Supplements:** Fictional supplement brand for bodybuilders. Used 3D objects to display all products and animate a bodybuilder prototype at the landing page. Implemented cart and stock logic. Built with Next.js, Framer Motion, Three.js (+ React Three Fiber & Drei) and Tailwind CSS.
- **Zen Tattoo:** While keeping it short and minimal, used both timing and scroll based animations with Framer Motion to create a futuristic and visually appealing image for the business. Even though it's a single page app, used Next.js to improve my skills. Styled with SASS.
- **Letters App:** CRUD app that helps you write letters. Users are able to use markdown and see the live version of their text while writing by the use of Markdown-it. Used MongoDB (Mongoose) to store data, displaying skeleton boilerplate while loading. Built with React and Tailwind CSS for styling.
- **Data Visualization Projects:** Combined all freeCodeCamp Data Visualization certificate projects into one React app. Used D3 to display data interactively, React Router Dom for routing and plain CSS for styling.

ADDITIONAL INFORMATION

- **Languages:** Turkish, English.
- **Interests:** Reading, spiritualism, workout, hiking.
